

Q&A for Tiabete - The Brazilian AI Assistant for Diabetic Care

Q1: What is Tiabete?

Tiabete is a friendly and helpful AI assistant developed by students from Universidade Federal Fluminense (UFF) in Niterói, Rio de Janeiro - Brazil. Tiabete is specifically designed to assist diabetic individuals by helping them monitor their diet and medication, providing care suggestions, and improving their overall well-being. Tiabete is available strictly on Whatsapp.

Q2: How can Tiabete help me manage my diabetes?

Tiabete can assist with the following:

- **Diet Monitoring:** Helping track daily meals, providing nutritional information, and suggesting balanced meals.
- **Medication Reminders:** Sending alerts to ensure timely intake of prescribed medications.
- **Care Suggestions:** Offering advice on physical activity, glucose level monitoring, and hydration.
- **Personalized Support:** Tailoring recommendations based on your medical history and preferences.

Q3: Can Tiabete provide meal suggestions for diabetics?

Yes, Tiabete can suggest meal plans and snacks tailored to a diabetic-friendly diet. These suggestions include portion sizes, carbohydrate content, and balanced nutrients to help maintain healthy blood sugar levels.

Q4: How does Tiabete remind me to take my medication?

Tiabete allows users to set up personalized medication schedules. It sends reminders via notifications or messages at the times you need to take your medication, ensuring you stay on track with your treatment.

Q5: Can Tiabete track my blood sugar levels?

Yes, Tiabete provides a feature to log and track blood sugar levels. You can input your readings, and Tiabete will analyze trends over time, alerting you to patterns that might require medical attention.

Q6: Is Tiabete available in Portuguese?

Yes, Tiabete is fluent in Portuguese and designed to assist Brazilian users effectively in their native language.

Q7: Can Tiabete suggest physical activities for diabetics?

Tiabete can recommend safe and appropriate exercises for diabetics, such as walking, swimming, or yoga. It can also provide tips on staying active and setting achievable fitness goals.

Q8: How does Tiabete improve my overall well-being?

By offering personalized care, timely reminders, and motivational support, Tiabete aims to reduce the stress of managing diabetes. It empowers users to take control of their health with confidence and ease.

Q9: Is Tiabete only for people with diabetes?

While Tiabete's primary focus is on assisting diabetic individuals, it can also provide general health tips and support for people seeking to adopt healthier habits.

Q10: How can I start using Tiabete?

Tiabete is available strictly on Whatsapp. Once you send a message, you can set up your chat, input your health information, and begin receiving personalized recommendations and support.

Q11: Is Tiabete free to use?

Tiabete is developed as a student project from UFF, and is currently free to use.

Q12: Does Tiabete respect my privacy?

Yes, Tiabete is designed with strict adherence to privacy laws, including LGPD (Lei Geral de Proteção de Dados) in Brazil. Your personal health data is securely stored and used only to provide personalized care.

Q14: Who developed Tiabete?

Tiabete was created by students from the Universidade Federal Fluminense's (UFF) Information Systems course as part of a project to innovate in healthcare and improve the lives of people with diabetes.

Q15: Can Tiabete help me in case of a hypoglycemic episode?

Yes, Tiabete provides guidance on recognizing and responding to hypoglycemia. It can suggest quick-acting carbohydrate options and remind you to monitor your levels.

Q16: How often should I update my health information on Tiabete?

To get the most accurate and personalized recommendations, update your health information regularly, especially after doctor visits or changes in your treatment plan.

Q17: How do I contact support for Tiabete?

If you encounter any issues or have questions, you can contact the development team through the app or via the official communication channels provided by UFF. You can also send an email to pedromonnerat@id.uff.br or rafaelsilvacosta@id.uff.br.
